

GEN AI

Machine \Rightarrow Learn & think & apply logic

- Domain \Rightarrow
- ① E-commerce
 - ② education
 - ③ transportation, logistic, supply chain
 - ④ Medical

1950-1960 1960-1970 1980-1990 1990-2000

2000-Present

① 1950-1960 (Alan Turing, John McCarthy, Marvin Minsky)

- ① Rule based system \Rightarrow Manually condition
- ② Perception

human neuron

Neural network

Optimization

1960-1980 Expert system

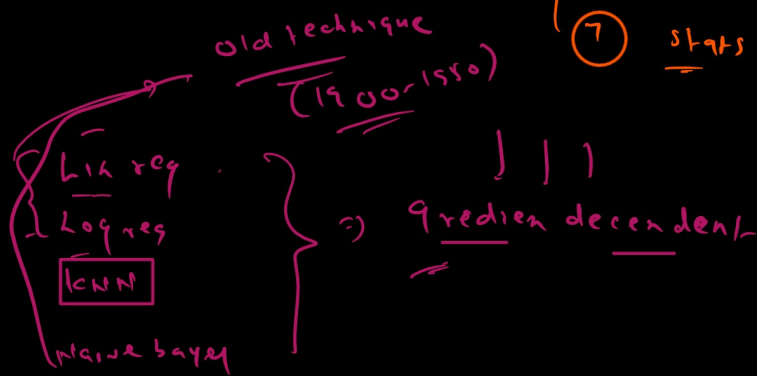

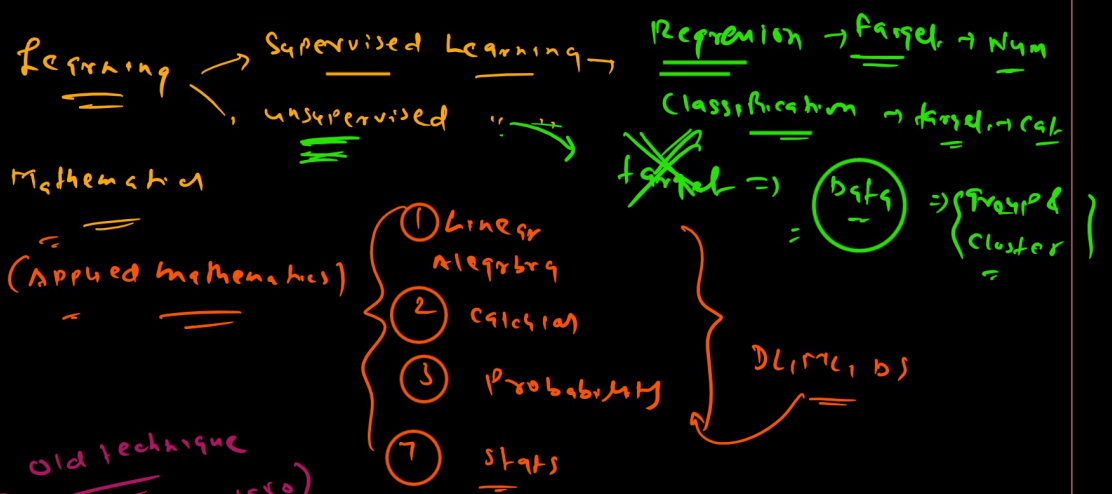

Rule based system \Rightarrow Advanced

1970-1980 \Rightarrow few ML \Rightarrow ML \Rightarrow AI

Machine + Learning

Mathematical

1950-1970

1980 ⇒ Re Birth of the AI

- ① ANN ← (1950-1960)
 ② BP ⇒ Jeffrey Hinton
Godfather of Modern AI

- ③ RNN ⇒ ANN + feed loop

ANN: tabular
 Seq. image

Sequence (text, audio)

my name is sunny

- 1990 ⇒ ML ⇒
- ① AdaBoost
 - ② GB
 - ③ SVM
 - ④ LSTM

⑤ CNN

→ Image video

Yann Lecun ⇒ LENET
 = MNIST

CNN ⇒ Convolution + Pooling + ANN

ANN \Rightarrow Artificial Neural Network

Classical AI

- ① Rules.
- ② human

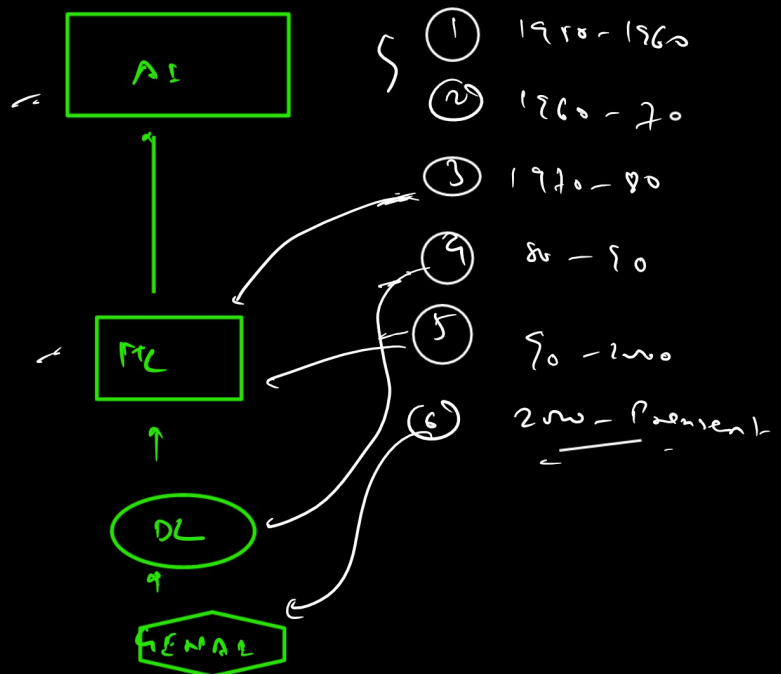

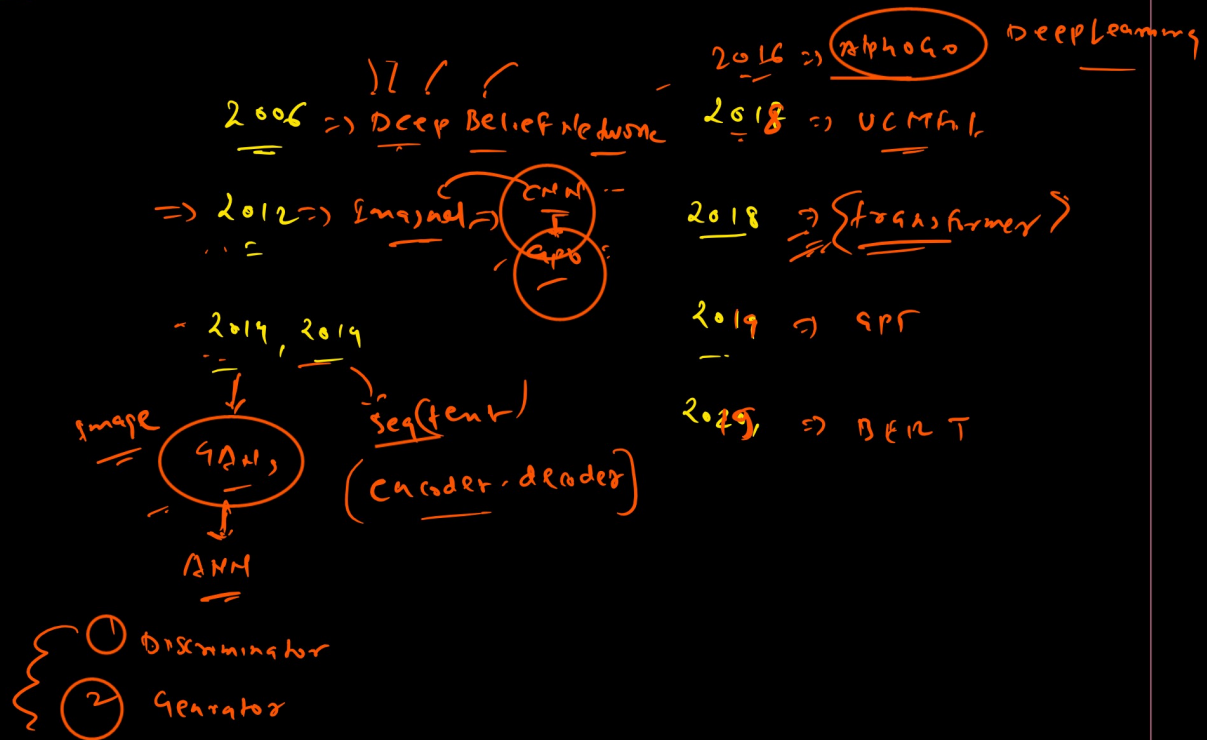

ML, DL

Modern AI

- ① Algorithm
- ② Mathematics

(Lin Alg, prob, stats, GI)

Deep Learning (2000 - Present) it is erg DL

Generative \Rightarrow

- 1 Discriminative ML
- 2 Generative ML

Des model

Lin reg \Rightarrow house price prediction

INTOS

you & me

Supervised learning

Gen model

text, image
vid, aud.

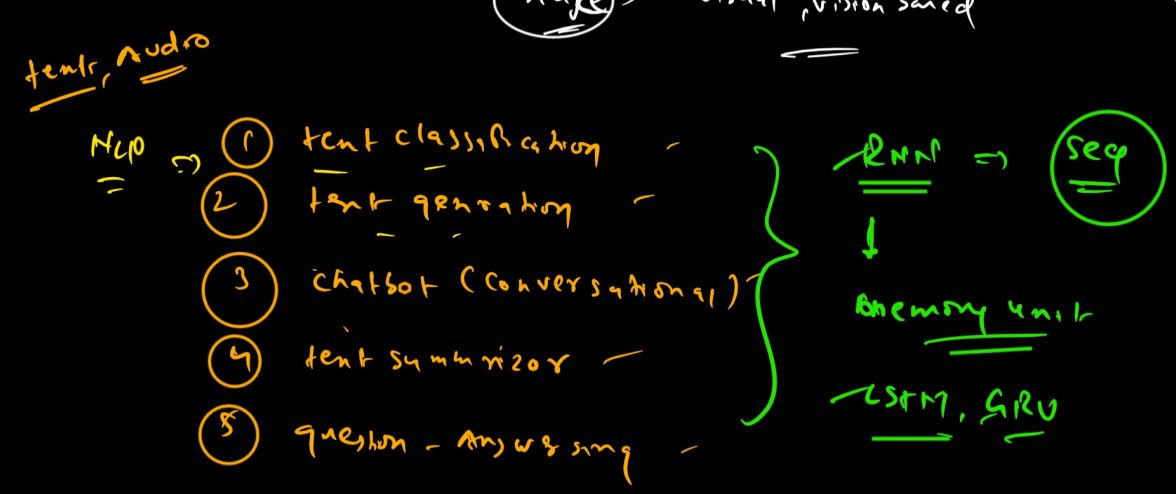

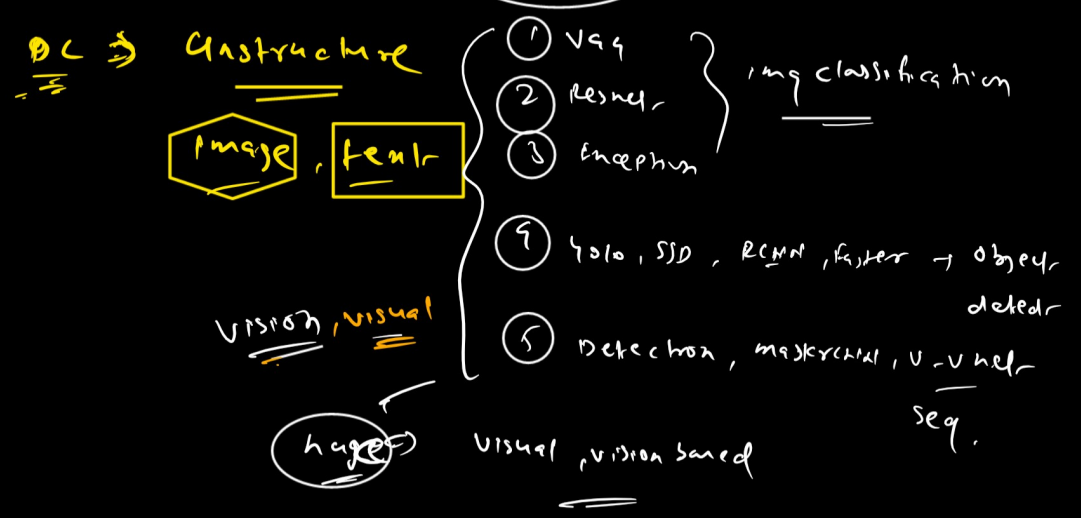

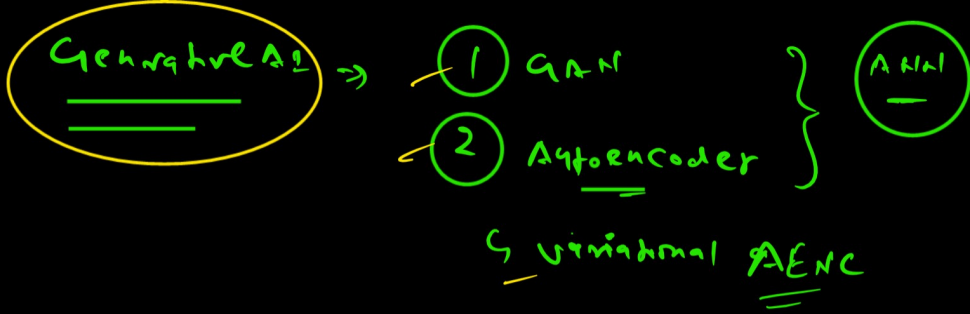

- 1 large data
- 2 General Model
- 3 training
(Supervised & unsupervised)

Generative Model

- 1 img to img generation } homogeneous
- 2 text to text generation }
- 3 img to text gen } heterogeneous task
- 4 text to img gen }

Markov model \Rightarrow Probability

Transformer

GEMINI →

Transformer

early

RNN → LSTM → Encoder-decoder → Attention → Transformer
